

EMQ Ball Bearings

Brief introduction

EMQ ball bearing is specially designed to meet all the bearings needed for Electric Motor Industry. Special consideration has been given to quietness, internal tolerances, lubrication, seals and shields. Various lubricants are available that will operate over a wide temperature range. Several tolerance grades are available to meet the specific motor requirements.

Characteristics of EMQ ball bearings

- Low Vibration
- Long Life
- High Speed
- High Temperature Resistant

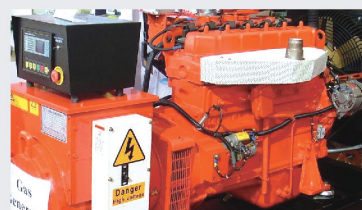

Applications

Car

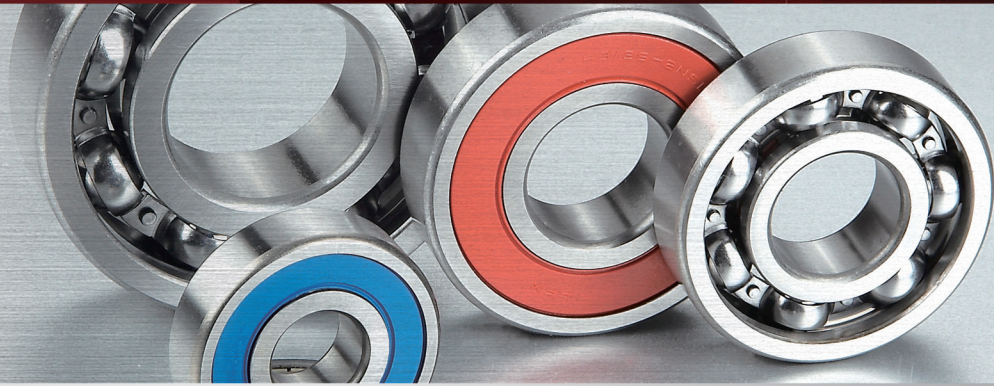

Motorbike

Generator

Ningbo Accor Machinery (Bearings) Co Ltd

EMQ Ball Bearings

Add: 4F, 675 Shiji Avenue, Jiangdong, Ningbo 315040, China
